

## Environmental Policy

Danatrol Ltd specialises in the manufacture and assembly of precision engineered components to customer requirements in a wide range of materials for industries including aerospace, security, energy, hydraulic systems and electronics.

Danatrol Ltd recognise that our day-to-day operations have an impact on the environment and are committed to reducing that impact through continual improvement in our environmental performance. To achieve this, we will:

- Establish, implement and maintain an Environmental Management System to meet the requirements of ISO 14001:2015.
- Operate in compliance with all relevant environmental legislation, regulatory requirements and other applicable obligations.
- Protect the environment, prevent pollution and minimise the risk of environmental incidents.
- Use energy efficiently, reduce energy consumption where possible and work towards a long-term transition to low carbon and ultimately net-zero operation.
- Promote the efficient use of materials, resources and packaging, and consider environmental impacts during process planning and product realisation.
- Minimise the production of waste and reuse or recycle waste wherever practicable.
- Manage hazardous substances responsibly, ensuring safe storage, handling and disposal.
- Establish measurable environmental objectives and targets. These will be monitored and reviewed to evaluate the effectiveness of this environmental policy.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Strive to continually improve our environmental performance by periodically reviewing our Environmental Policy in light of our current and planned future activities.
